About Waterproofing & Sai Shree

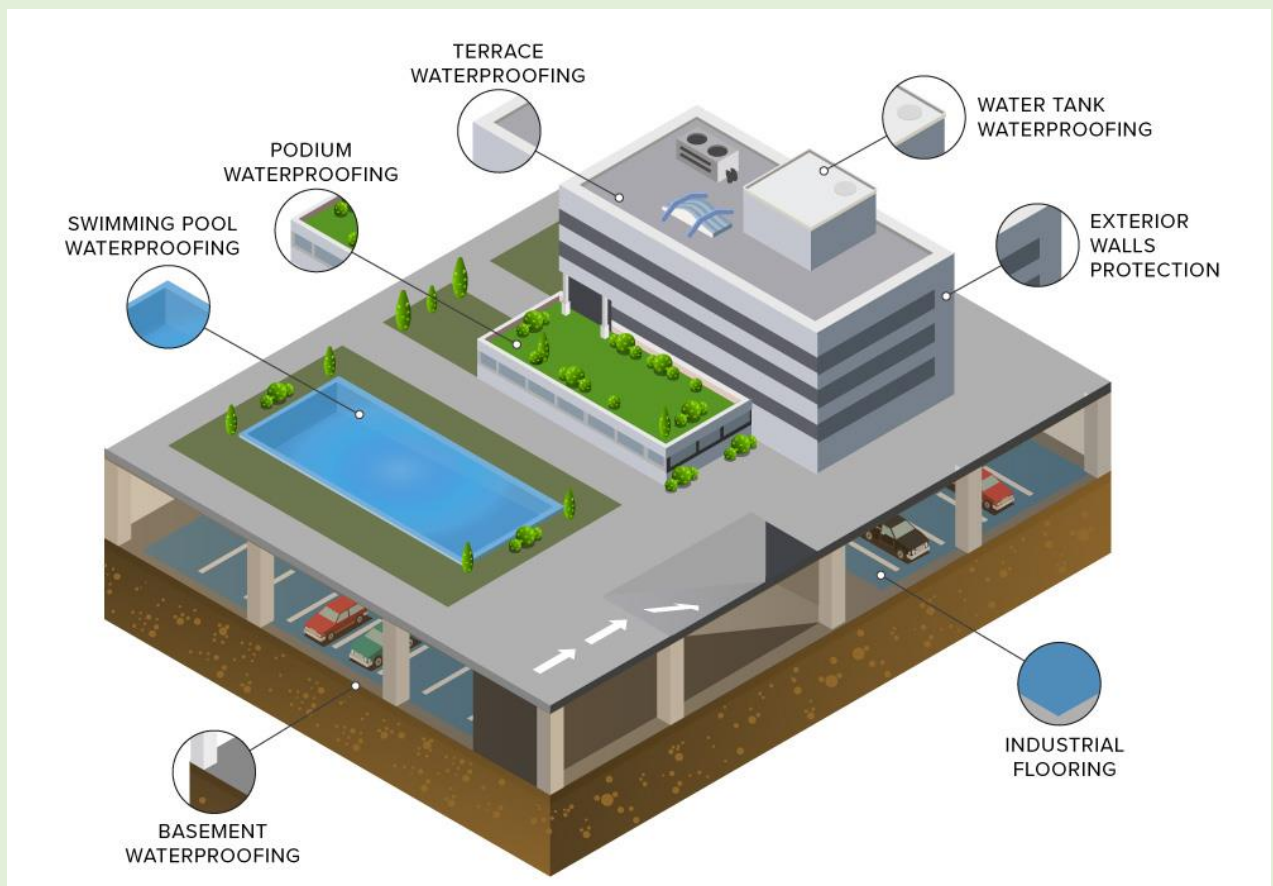

Waterproofing

Waterproofing is the process of making an object or structure waterproof or water-resistant so that it remains relatively unaffected by water or resisting water ingress under specified condition.

Waterproofing is a treatment you do or give to items, that make them resistant or impervious to water, Waterproofing system provides protection to the structure from water ingress.

Waterproofing is the formation of an impervious barrier over surfaces of foundations, roofs, walls and other structural members. The function of the impermeable barrier is to prevent water penetration. The building surfaces are made water-resistant and sometimes waterproof.

Waterproofing in general is required at two stages of a building life cycle: New Construction; Repairs and Restorations.

At **Sai & Sai Shree Waterproofing**, we believe that construction industry is rapidly evolving and changing its requirements and expectations which creates a niche requirement of innovative yet durable and reliable products and solutions.

We thrive every single day to raise standards and set new benchmarks for our services, through continuous innovations and research, which is due to constant working and all the people on-ground to identify the right requirement.

The company is able to set its strong footprints in the industry of construction and waterproofing since 2013 and has been serving an ever-increasing clientele need and requirement with the principle of serving better each and every day.

We offer variety of products and solutions that is intended to meet all the needs and requirements of any construction project. The product range encompasses a range of products in construction chemicals industry that are exemplary benchmark for quality and standards which is the backbone to the brand.

Vision

We want to serve the infrastructure industry with the finest products and solutions those are driven through research, quality and innovation along with giving the stakeholders the best experience and satisfaction.

Mission

We challenge the status quo in the present practices and products by delivering highly effective and efficient products and solutions that are needed in today's infrastructure industry through value addition and maintaining the highest standards of quality.

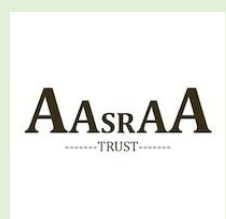

Core Values

From the day of inception, we believe in values and these values contribute to the growth and the way we provide the service. We are quality oriented by our continuous research and implications.

We work at domestic constructions and civil projects from foundation till terrace to serve as one point solution for waterproofing in collaboration with builders and architects. We are also subcontracted for the tunnel and dam waterproofing to use injection grouting technique to treat the leakage and seepage from negative side of surface. We are well known in the competitor lobby for our high quality and written warranty of our waterproofing and heatproofing work with all new, innovative and latest techniques.

Our renowned clients

We serve in Uttarakhand, Rajasthan, Himachal Pradesh, Punjab, Madhya Pradesh and Delhi/NCR for waterproofing and heatproofing services. We have regular and trained applicators who have been trained on-site as well as chemical company trainers in training organized at their organization periodically to use the chemicals in best possible ways and to do on-ground research. We provide the waterproofing treatment for terrace, exterior walls, balcony, washroom, sunken area, swimming pool, podium, terrace garden, retaining walls, basement, foundation, underground / overhead water-tank, seepage due to capillary action, negative side waterproofing by injection grouting etc.
